DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 & 11, drawn to a switch circuit, classified in class 307, subclass 112.
- II. Claim 10, drawn to a receiver apparatus, classified in class 307, subclass 149.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the receiver apparatus can utilize any switch which does not contain the claimed specifics of the subcombination switch. The subcombination has separate utility such as selecting between any two signals.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2836
